Airclos
Aluminum Systems

About us

At Airclos, we've been transforming outdoor spaces for over 40 years, turning them into exclusive environments that enhance the customer experience and boost business profitability.

★ **How do we do it?** By creating cutting-edge enclosures that combine high-end engineering with bold, contemporary design — turning any space into a functional and unforgettable experience, 365 days a year.

What we offer

As a hospitality business, you gain access to premium services and benefits tailored for top-tier professionals.

ADVANTAGES OF OUR SYSTEMS

★ These aren't just terrace enclosures, they're the opportunity to keep your space open all year round.
Always open, always in use, always full.

■ MORE GUESTS, MORE REVENUE

- **Expand usable space without construction work**, turning every square meter into profit.
- **Year-round terraces**, regardless of weather, without compromising on design.
- A unique aesthetic that positions **your venue as a premium destination**.

■ PREMIUM COMFORT & EXPERIENCE

- **Warm in winter, cool in summer** – for an exceptional guest experience.
- **Outstanding acoustic insulation** for a calm, sophisticated atmosphere.
- **Seamless transitions** between indoor and outdoor spaces, blending areas with harmony and elegance.

■ ENERGY EFFICIENCY & COST SAVINGS

- **Reduced heating and cooling costs** thanks to advanced thermal engineering.
- **Naturally bright spaces** that lower electricity use without sacrificing style.
- **High-performance materials** for maximum efficiency and flawless finishes.

■ ICONIC, CUSTOM DESIGN

- **Bespoke systems with premium finishes**, tailored to match your venue's identity.
- Effortless elegance **with minimalist structures that enhance the architecture**.
- A signature design that **sets your business apart** and builds a strong brand presence.

■ A SMART, LONG-TERM INVESTMENT

- **Maximize profitability** per square meter and elevate your venue's category.
- **Minimal maintenance**, maximum durability.
- **Adds long-term value** to your business and boosts its market position.
- **Fast return on investment** — more guests and higher revenue from day one.

TERRACES WITHOUT LIMITS ALWAYS OPEN. ALWAYS IN USE.

Terraces are the beating heart of hospitality — a place where light, views, and open air create unforgettable experiences.

What if you could offer that experience 365 days a year?

With Airclos, your terrace adapts to the moment: Open and lively on sunny days, sheltered and cozy when the weather demands it and always preserving its core essence.

- A true sense of **freedom and openness in every season.**
- **Uninterrupted views and direct connection with the outdoors** thanks to frameless glass enclosures.
- **Total flexibility to open or close depending on the day** — without compromising design or guest comfort.
- **A profitable investment** that transforms every single day into a new opportunity to fill your space.

EXCLUSIVE BENEFITS FOR HOSPITALITY

- **Free project assessment:** space analysis, profitability simulation, and personalized guidance — no strings attached.
- **VIP consultancy:** direct access to a dedicated specialist for ongoing support.
- **Special pricing & conditions** for hospitality business.
- Access to exclusive training, private events, and on-site project visits.

SUCCESS STORIES

CONTESSA, THE PHOENICIA MALTA

In a setting where luxury and heritage come together, The Phoenicia Malta needed a solution that would allow them to use their terrace year-round — without losing its unique charm.

With Airclos systems, they transformed their outdoor area into a premium experience: more versatile, more profitable, and perfectly in sync with their exclusive design.

Now, every sunset can be enjoyed without limits — with the comfort and sophistication that define this iconic hotel.

SUCCESS STORIES

CAFÉ DE PARIS, MONACO

Renovating an architectural icon with more than 150 years of history in the heart of Monaco required a solution that lived up to its legacy. Exclusivity, design, and top performance were non-negotiable.

Our high-performance retractable roof turned this legendary brasserie into a luminous, versatile, and always comfortable space — where every detail honors the building's essence without compromising on innovation.

Guests now enjoy a seamless experience: open-air elegance on sunny days, flawless protection in any weather — without losing an ounce of sophistication.

SUCCESS STORIES

Airclos
Aluminium Systems

LE FLORIS, SWITZERLAND

Perched on an elevated site with stunning sea views, Le Floris is an exclusive destination where every event deserves a remarkable setting. To preserve the connection with the landscape without sacrificing comfort, Airclos designed a fully integrated solution with a retractable roof, vertical sliding windows, and awnings — creating a flexible space all year round.

The vertical sliding windows offer uninterrupted panoramic views, while the combination of the retractable roof and awning allows guests to enjoy open skies on clear days or a cozy shelter when the weather turns. A space designed to impress — and to be enjoyed in total freedom.

SUCCESS STORIES

LOTTIE, AUSTRALIA

Located on the rooftop of the exclusive The Eve Hotel, Lottie is a vibrant Mexican restaurant offering breathtaking views of Sydney's skyline.

The challenge was to create an open-air space that delivered spaciousness, clear views, and weather protection — all without compromising the restaurant's sleek design.

Airclos delivered the solution: a T8000 ER retractable roof system designed to support large glass panels while minimizing the presence of aluminum. This setup maximizes natural light and offers full opening on sunny days, with the flexibility to close and protect the space whenever needed.

CARMEL MARKET, NETHERLANDS

Covering a large interior courtyard with no intermediate pillars was a major architectural challenge — one that only a high-performance solution could overcome.

We designed a dual-pitch retractable roof with inverse opening, allowing the center to remain completely open when the system is retracted.

Thanks to this innovation, the space remains full of life even in the colder months — offering a one-of-a-kind experience beneath the stars.

SUCCESS STORIES

MANOIR DE BEAUVOIR, FRANCE

This majestic Victorian estate, surrounded by 92 hectares of natural landscape, is committed to offering guests an exceptional stay.

Imagine a wellness area where guests can enjoy a heated pool and relaxation zones regardless of the weather — made possible thanks to the integration of a retractable Airclos enclosure.

This innovative design not only shields from wind and rain, but also maintains an uninterrupted connection with nature, offering sweeping views of the surrounding scenery. The flexibility to open or close the space ensures year-round serenity and luxury — making the hotel a benchmark for blending historical heritage with modern comfort.

THE KING CHARLES, UNITED KINGDOM

The King Charles was looking to expand its capacity without losing its cozy charm. The challenge: create a usable outdoor space all year long — while preserving natural light and the connection with the surroundings.

Airclos delivered a motorized retractable roof and sliding glass curtains, enabling full opening and unobstructed views.

The new space has not only increased capacity, but also adapts to any occasion — from private events to extended dining areas.

A transformation that combines flexibility, design, and profitability — delivering the perfect guest experience in any season.

CAFÉ EN SEINE, IRELAND

Located in the heart of Dublin, the iconic Café en Seine revamped its venue with The Botanical Garden — a spectacular Parisian-inspired indoor garden.

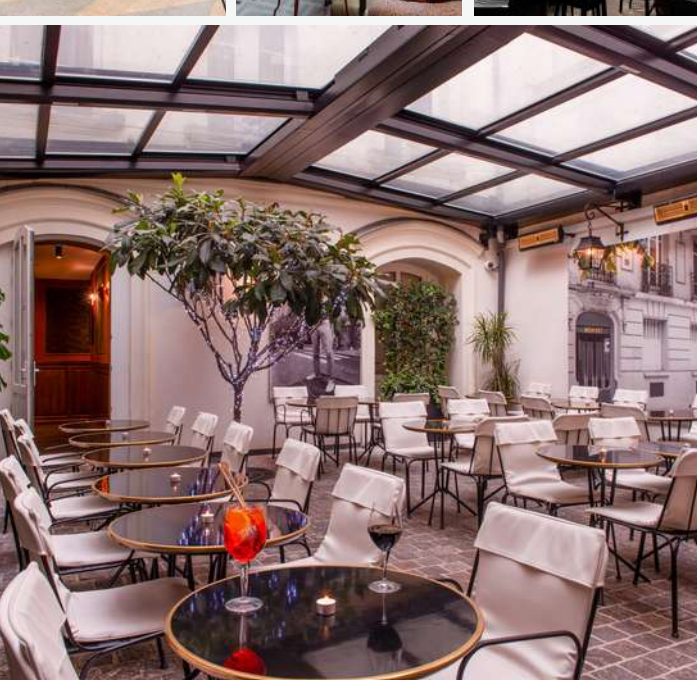

The challenge: cover a large, high-ceilinged space without compromising brightness or design.

Airclos developed a custom solution combining aesthetics, functionality, and versatility — cementing Café en Seine's status as a symbol of exclusivity in Dublin.
